CONSISTENCY

POLIMIX

Polimix strips are the best material for the targets in the frame. It is flexible foam that can stop arrows from compound bows with very high draw weight. This material provides a long lifespan of the target and reliable and safe stop effect of the arrows. Thanks to the frame system only the used layers can be changed so that the target is maximally and efficiently used. Polimix strips are popular material for FITA competitions and for intensive use in archery clubs.

- No. 1 for sport clubs
- The best for competitions and intensive archery
- The most suitable solution for the targets in frame
